

软陶班教学目标:

本课程旨在带领学生从零基础入门，掌握软陶从揉土、塑形到烘烤、打磨的全流程，学会调色、肌理制作等核心技法。软陶材料安全无毒，在轻松愉悦的手作过程中，通过揉、搓、压、粘、切、嵌等基本技法，学习色彩搭配与立体造型，鼓励孩子发挥想象，能够独立完成从设计到成品的完整制作流程，在体验手作乐趣的同时，培养孩子的空间想象力、动手能力和手脑协调能力。让孩子在一次次创作中收获成就感与自信。

“让孩子在指尖创造精彩，在创作中发现更好的自己！”

Polymer Clay Class – Learning Objectives

This course introduces students to polymer clay from the basics, guiding them through the complete creative process—from conditioning and shaping the clay to baking and finishing. Students will learn essential techniques such as color mixing, texture creation, and three-dimensional modeling.

Made with safe, non-toxic materials, polymer clay offers a fun and relaxing hands-on experience. Through techniques such as kneading, rolling, pressing, gluing, cutting, and embedding, students explore color combinations and three-dimensional forms while developing their spatial awareness, fine motor skills, and hand-eye coordination.

Students are encouraged to use their imagination and independently complete the creative process from design to finished product. Through hands-on exploration and repeated practice, they experience the joy of creating while building a sense of accomplishment, confidence, and creativity.

Let little hands create big possibilities, and discover the best in themselves through creativity!
